

## **BIG BROTHER AND CONTROL**

### **Southern Colorado Patriots Club**

- It's not about health care reform, stimulating the economy or protecting the environment.
- It's about the ultimate & total control of the citizens (life & death).
- When the government controls the banks & money; the redistribution of wealth; the housing; the manufacturing of goods & services; the kind of car one can drive (small death traps); the temperature in one's home; the kind of light bulbs we can use; one's retirement; one's ability to earn (pay caps); the food one eats; fights the photo id provisions to ensure only actual citizens vote; values the lives of animals, plants and terrorists over American citizens; declares the air (CO<sub>2</sub>) we exhale & plants inhale as a toxic gas so it can be regulated; tries to eliminate our guns and ammunition; and finally & ultimately decides who gets what health care and when (i.e. who lives or dies) we are in serious trouble. It means we are already living under tyranny. This must stop!
- Fellow citizen—patriots, it is time to act! We must demand our liberties and our freedoms!
